

We are expanding our team with a

## Full Stack Developer/IT-Developer

FULL TIME/PART TIME/FREELANCE

We're 506, we're faster - better - data-driven. Our mission: to increase our clients' success through automated, yet personalized marketing solutions based on proprietary data. Shape the future of international projects with us and bring your know-how and passion to our new, digital and dynamic company based in Linz. Are you in? Are you a developer who wants to challenge yourself with a unique marketing AI project? Can you independently execute scalable software solutions from project planning to final project acceptance? As a full stack developer, you are familiar with frontend and backend programming languages, development frameworks and third-party libraries?

### WHAT WE OFFER

We offer you the opportunity to proactively participate in the development of our innovative startup: You will develop a unique AI-supported SaaS solution for scalable market success based on our business model - independently in your area of expertise and you are also welcome to contribute strategically. We offer you maximum independence for your professional self-realization with simultaneous security of a structural-organizational framework: creative hotspot working space in the Linz "Tabakfabrik" or home office - flexible to use as well as flexible arrangement of your working hours.

### YOUR TASKS

- You design and develop scalable software solutions.
- You write clean, functional codes on front-end and back-end.
- You check and fix bugs or other coding problems.
- You design the software architecture.
- You develop the frontend of applications through visual design.
- You take on operational tasks in design (including wireframes, mockups, etc.), further develop user interface patterns, create prototypes, etc.
- You develop interaction concepts and user guidance concepts, design and architecture changes based on prototypes, scenes and flows.
- You develop UX/UI designs and data visualizations.
- You develop and manage well-functioning databases and applications.
- You write effective APIs.
- You test software to ensure responsiveness and efficiency.
- You handle troubleshooting, debugging, and upgrading software.

- You create security and privacy settings.
- You construct features and applications with mobile responsive design.
- You write technical documentation.
- You improve software in collaboration with our data scientists and analysts.

## WHAT YOU BRING IN

- You have a degree in computer science, statistics, or a similar field, or alternatively have comparable, proven work experience as a full stack developer or in a similar field.
- You bring experience in desktop and mobile application development.
- You are familiar with common stacks.
- You have knowledge of multiple front-end languages and libraries (e.g. HTML/ CSS, JavaScript, XML, jQuery).
- You are proficient in multiple backend languages (e.g. Java, Python) and JavaScript frameworks (e.g. Angular, React, Node.js).
- Databases (e.g. MySQL, MongoDB), web servers (e.g. Apache), and UI/UX design are not new territory for you.
- You pay attention to detail and have an analytical mindset.
- You enjoy working in a team.
- You demonstrate proactive working with a willingness to learn, test new ways of working and introduce new tools.
- You are proficient at presenting complex analysis in a way that stakeholders without a technical background can understand, such as with data visualization.
- You have the ability to work across multiple industries and think your way through the different stages of the customer journey.
- You speak English fluently, German is advantageous..
